### TH -Printer Error

POS Printer Error. The POS Printer is not responding correctly. PC EFTPOS has passed a command back to windows to print and it cannot find the printer, or the printer did not respond.

Check the printer connections, the printer power and the printer paper. Also check the printer configurations. At a development level consider who is controlling the printing, the POS Vendor should control the printing. Ask your POS Vendor who is controlling the printing, if it is PC EFTPOS then check the default printer configuration on the PC. Also ask the POS Vendor has this configuration been used before, if it is a first time use.

### XO -No Response

The bank has not responded to the request. Check that the merchant and terminal ID's are correct

Check that the merchant and terminal ID's are correct. Also check the POS AME.

BankWest uses a TID (8), and MID (8) + POS AME (10 Digits)  
Both are 7 digit ,a 0 may be inserted at the front of both of them to make the 8 digit required number.

The two ID's should be exactly the same.

The POS AME should be 10 digits, if it is not contact your POS Vendor for a conversion number.
